Model AP Mechanical Crane Scales

Features and benefits

Available in low, intermediate and high range models – Thirteen capacities from 500 to 50,000 pounds. Nine capacities from 200 to 20,000 kg.

Anti-parallax dial and pointer – Easy to read even at an angle.

Tare capability – Tare loads up to 20% of capacity can be zeroed out by means of zero control.

Dust protection – Pinion gear, sector gear and shafts are mounted in precision aircraft bearings, permanently sealed against dust and dirt. Oiling is never required.

Tough construction – Mechanism case is a heavy aluminum alloy casting, tough enough to resist even heavy blows.

Ingenious design – Utilizes a specially designed alloy steel beam that translates force to pounds. Full scale reading results from beam deflection of only 0.026". Applied loads are indicated instantly.

Reduced wear – Pinion and sector gears are cut from stainless steel and hardened aluminum. Use of these dissimilar materials greatly reduces friction and wear.

Protective finish – Scale cases are coated with a baked-on powder paint process making them resistant to chips, scratches, rust and corrosion.

Maximum indicator – Remains in position to indicate peak load point after load is removed from scale.
