Full Frame Portable

DigiTOL® TRUCKMATE®

Truck Scale

**Projects Move from Site to Site...
So Should the Scale**

METTLER TOLEDO

Easy to Move, Install, and Maintain

- Fully assembled, portable truck scale saves time and eliminates possible installation errors
- Low profile is less than 2' high
- DigiTOL technology...hermetically sealed (NEMA 6P) DigiTOL POWERCELL® weight cells with built-in microprocessor monitors performance, diagnostics
- Orthotropic steel deck easily handles torsional forces generated by a fully loaded truck
- METTLER TOLEDO builds all components for single-source responsibility

Available in 35' and 70' lengths with a 10' wide platform, the 7562 Full Frame Portable is ideal for industries such as logging, sand and gravel, construction, road building, concrete/asphalt batching, and others who move operations from one job site to another. This scale can easily follow along to keep precise track of on-site operations. Demolition and reclamation contractors will also find it a great help to keep accurate track of how much scrap metal, rubble and dirt are removed from each site. Great for clean-up jobs from floods, etc.

Fully Assembled, Low-Profile Scale

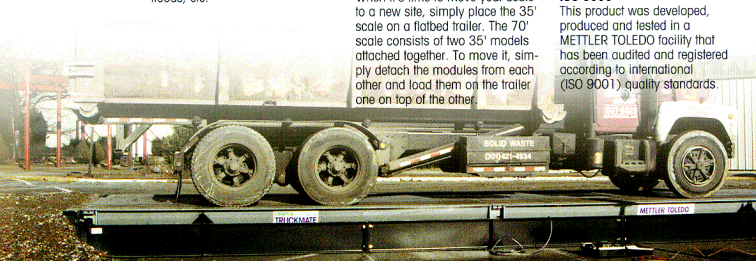

The 7562 Full Frame Portable is delivered fully assembled with the scale contained within the 7562 full frame accessory, making it truly portable. The scale is easy to install, which saves time and eliminates possible installation errors. And it's less than 2' high, which means that approaches can be shorter, requiring less approach material and less area.

When it's time to move your scale to a new site, simply place the 35' scale on a flatbed trailer. The 70' scale consists of two 35' models attached together. To move it, simply detach the modules from each other and load them on the trailer one on top of the other.

ISO 9000

This product was developed, produced and tested in a METTLER TOLEDO facility that has been audited and registered according to international (ISO 9001) quality standards.
